HOW TO USE INDEX

Index is divided into five sections: authors, subject matter, columns, Sports Philatelists International organization, and titles.

Obviously only author-designated articles appear in the authors section.

In the subjects section, an entry under a specific topic means that in some way the article seems to be related to that category. I tried to think of all types of users and their needs as I placed contents of articles under topics. I apologize in advance for any inconsistencies. It is difficult to be consistent from day to day, let alone when a few days have elapsed between entries. This project has taken five years.

A topic had to be mentioned in the article to appear under a subject. I did not wish to second guess the author.

Most authors used the Scott Catalog when identifying the stamps by number. Thus, only non-Scott stamps have a prefix; these include: GI and SG - Stanley Gibbons, MI - Michel, MIN - Minkus, TR - Trachtenberg, and YT - Yvert Et Tellier. In a few cases stamps have been renumbered in newer catalogs; #105/280 indicates that 105 was used in the article and 280 in the current catalog.

The index has been checked against the volumes three times. I would like to thank the compilers of earlier indices: Brown, Bruce, La Porta and B. Williams. This information was used in checking for completeness in these volumes. Still there is room for error. If you find missing or incorrect entries, please notify me. Information is on the computer and will be corrected for a future edition.

Titles of continued articles with same title and author are given in one entry. If detailed information concerning an article is available, it is noted in the columns section. Many checklist and handbook topics have not been further categorized into topics.

Topics in the columns sections are in alphabetical order by category. The titles within each category are in sequential format where appropriate. The review category has titles in alphabetical order and all reviews appear in this section whether or not they appeared in columns.

Titles section contains all titles found in the journals with the exception of some listed in the Sports Philatelists International section only.

The American Library Association filing manual was used as a guide in the alphabetizing process. In addition an American Philatelic Research Library booklet was consulted. Major guidelines to assist you in finding articles include:

1. Articles are alphabetized using the word-by-word method.

2. All acronyms are treated as a single word without periods.

3. In rare instances of misspelled words, these were corrected without notation.

4. Initial numerals, Arabic and Roman, are placed before titles beginning with letters. These are found low to high in sequence. Numerals within the title are treated similarly.

5. Spelled-out numbers are found in the normal alphabetical listing.

6. All punctuation, non-alphabetical signs and symbols are ignored in the alphabetizing process.
7. A prefix that is part of the name, e.g., DuMaurier, is treated as a separate word unless it is connected to the rest of the name directly or by an apostrophe without a space. Note that since this is an all-capital letter format, in some cases the prefix (De) was separated for readability.

8. Names are listed by the last name unless found as part of a company name.

9. Terms of honor, Dr., Mrs., Sir, are ignored in the alphabetizing process.

10. Mac is found under Ma while the Mc is located under Me.

11. The ampersand (&) is located as it is spelled out in English.

12. Initial articles, e.g., the, a, and an, are ignored. Similarly, initial articles in non-English languages are ignored. These include: die, el, il, la, le, l', and les. An exception is Los Angeles, which appears under "L."
